LIST OF CONTENTS

NUMBER 1

Shu Xiaoping and **Sun Liangxin**	1	Thermomechanical buckling of laminated composite plates with higher-order transverse shear deformation
B. Ghosh and **J. N. Bandyopadhyay**	9	Bending analysis of conoidal shells with cut-outs
D. C. Winfield and **T. E. Tan**	19	Optimization of clubhead loft and swing elevation angles for maximum distance of a golf drive
Xiaojian Liu	27	On the stability of a Newmark's scheme-based predictor–corrector algorithm
Zhou Ding	35	Torsional vibration of uniform columns with arbitrarily shaped cross-sections partially submerged in water
H. R. Dorfi and **H. R. Busby**	43	An effective curved composite beam finite element based on the hybrid-mixed formulation
C.-L. Liao and **J.-S. Tsai**	53	Dynamic analysis of laminated composite plates subjected to transverse impact using a partial mixed 3-D finite element
N. I. Ioakimidis	63	Symbolic computations for the solution of inverse/design problems with Maple
G. Singh, **G. Venkateswara Rao** and **N. G. R. Iyengar**	69	Geometrically nonlinear flexural response characteristics of shear deformable unsymmetrically laminated plates
S. Kitipornchai, **Y. Xiang**, **K. M. Liew** and **M. K. Lim**	83	A global approach for vibration of thick trapezoidal plates
M. Ristinmaa	93	Consistent stiffness matrix in FE calculations of elasto-plastic bodies
Chongbin Zhao and **T. P. Xu**	105	Effects of backfill soils and incident wave types on seismic response of a reinforced retaining wall
T. Krauthammer, **H. M. Shanaa** and **A. Assadi**	119	Response of structural concrete elements to severe impulsive loads
A. G. Razaqpur and **H. G. Li**	131	Refined analysis of curved thin-walled multicell box girders
W. Glabisz	143	Application of Hamilton's law to the stability analysis of a double pendulum under nonconservative loads
Xian-Xin Cai	155	Free vibration of a thin rotating shell of revolution
K. C. Biswal and **A. K. Ghosh**	161	Finite element analysis for stiffened laminated plates using higher order shear deformation theory

CAS 53/6—Q

J. A. Figueiras and R. H. C. F. Póvoas — 173 — Modelling of prestress in non-linear analysis of concrete structures

W. F. Cofer and S. W. Kohut — 189 — A general nonlocal microplane concrete material model for dynamic finite element analysis

H. R. H. Kabir — 201 — Static responses of anti-symmetric angle-ply laminated shear-flexible clamped plates

Technical Notes

A. Joseph Stanley and N. Ganesan — 209 — Impulse response of cantilever beams with thickness discontinuity subjected to a point load

C. K. Soh and A. K. Soh — 219 — IPDOS in retrospect: lessons for the next generation of structural engineering systems

Announcements

227 — Call for papers: The Fourth International Conference on The Application of Artificial Intelligence to Civil and Structural Engineering

229 — Call for papers: The Sixth International Conference on Civil and Structural Engineering Computing

231 — Call for papers: The Third International Conference on Computational Structures Technology

I — Software Survey Section

NUMBER 2

R. Takagi, M. Maeda, K. Nakagawa and Duan Shrjin — 233 — A proposal of a design technique for optimum section with average stresses throughout frame structures

Huajiang Ouyang and Wanxie Zhong — 241 — A finite strip method in Hamiltonian formulation

T. V. R. Chowdary, S. Parthan and P. K. Sinha — 245 — Finite element flutter analysis of laminated composite panels

F. Genna — 253 — An accurate numerical integration scheme for solving structural problems in the presence of a 'no tension' material

Y. Y. Zhu and S. Cescotto — 275 — Transient thermal and thermomechanical analysis by mixed FEM

R. S. Bhatia and G. S. Sekhon — 305 — A novel method of generating exact stiffness matrices for axisymmetric thin plate and shell elements with special reference to an annular plate element

K. G. Xin, S. H. Bao and W. Y. Li — 319 — A semi-discrete method for analysis of tube-in-tube structures

J. Yuan, P. G. Young and **S. M. Dickinson**	327	Natural frequencies of circular and annular plates with radial or circumferential cracks
M. Ganapathi, T. K. Varadan and **V. Balamurugan**	335	Dynamic instability of laminated composite curved panels using finite element method
M. J. Alam and **A. R. Santhakumar**	343	System reliability analysis of transmission line towers
H. P. Lee	351	Effect of gravity on the stability of a rotating cantilever beam in a vertical plane
H. Liu, B. Dirr and **K. Popp**	357	Comparison of some shell elements
Suhuan Chen, Aijun Ma and **Wanzhi Han**	363	Design sensitivity analysis of nonlinear mode spectrum for large amplitude forced vibrations of beams
Jimin He	367	Derivation of an accurate damping matrix of a dynamic structure using its FE model and measured FRF data
C. Y. Huang and **J. T. Oden**	375	GAMMA2D: a multiregion/multiblock, structured/unstructured grid generation package fo. computational mechanics
Minghua Yu and **Changwen Xu**	411	Multi-objective fuzzy optimization of structures based on generalized fuzzy decision-making
A. E. Anuta, Jr	419	The modal equations model of the simplified hydrogen atom
T. Mizusawa	439	Application of the spline element method to analyse the bending of skew plates
S. P. C. Marques and **G. J. Creus**	449	Geometrically nonlinear finite element analysis of viscoelastic composite materials under mechanical and hygrothermal loads
H. Du, D. Hitchings and **G. A. O. Davies**	457	Application of an aeroelasticity beam model for flexible multibody systems
		Technical Notes
G. V. Rao, N. R. Naidu and **K. K. Raju**	469	Post-buckling of partially supported square plates subjected to thermal loading
O. J. B. Almeida Pereira and **J. P. B. Moitinho de Almeida**	473	Automatic drawing of stress trajectories in plane systems
		Announcements
	477	Call for papers: The Fourth International Conference on The Application of Artificial Intelligence to Civil and Structural Engineering
	479	Call for papers: The Sixth International Conference on Civil and Structural Engineering Computing

481 Call for papers: The Third International Conference on Computational Structures Technology

I Software Survey Section

NUMBER 3

W. K. Chiu, P. D. Chalkley and R. Jones 483 Effects of temperature on the shear stress–strain behaviour of structural adhesives (FM73)

P. Fadum and K. S. Surana 491 A least squares finite element formulation for plane elasto-statics based on p-version with applications to laminated composites

A. W. Koilpillai and K. S. Surana 509 p-Version least squares finite element formulation for axisymmetric incompressible Newtonian fluid flow

D. Winterscheidt and K. S. Surana 525 An alternative p-version least squares finite element 'boundary flux' approach for fluid dynamics problems

J. H. Kweon and C. S. Hong 541 An improved arc-length method for postbuckling analysis of composite cylindrical panels

F. Cesari 551 Simple programmes on thermoelastic analysis of composite laminate materials

H. S. Kou, K. T. Lu and C. C. Yu 569 Effective thermal conductivity of composite material with spherical inclusions in orthorhombic structure

C. H. Sun, M. A. Bradford and R. I. Gilbert 579 A reliable numerical method for simulating the post-failure behaviour of concrete frame structures

T. A. Philpot, K. J. Fridley and D. V. Rosowsky 591 Structural reliability analysis method for viscoelastic members

G. D. Hahn and S. Sritharan 601 Lateral response of underground pipelines to earthquakes

H. A. S. Rasheed and K. S. Dinno 613 An efficient nonlinear analysis of RC sections

H. A. S. Rasheed and K. S. Dinno 625 An improved nonlinear analysis of reinforced concrete frames

F. Auricchio and R. L. Taylor 637 A generalized visco-plasticity model and its algorithmic implementation

Y. B. Sun, X. Q. He and Q. H. Qin 649 A new procedure for the nonlinear analysis of Reissner plate by boundary element method

S. B. Liu and C. L. Tan 653 Boundary element contact mechanics analysis of pin-loaded lugs

O. G. McGee, C. S. Huang and A. W. Leissa 667 Influence of corner stress singularities and non-structural mass on the vibrations of cantilevered skewed trapezoidal plates

O. G. McGee, W. D. Graves, T. S. Butalia and M. I. Owings 679 Natural vibrations of shear deformable rhombic plates with clamped and free edge conditions

Sung Chul Lee, Byung Man Kwak and Oh Kwan Kwon 695 Analysis of incipient sliding contact by three-dimensional linear complementarity problem formulation

M. Yener and K. Chompooming 709 Numerical method of lines for analysis of vehicle–bridge dynamic interaction

C. W. S. To and M. L. Liu 727 Random responses of discretized beams and plates by the stochastic central difference method with time co-ordinate transformation

S. Rahman and M. Grigoriu 739 Local and global models for nonlinear dynamic analysis of multi-story shear buildings subject to earthquake loading

Technical Notes

H. S. Yu 755 A closed-form solution of stiffness matrix for Tresca and Mohr–Coulomb plasticity models

S. Latha Nayar, K. Kanaka Raju and G. Venkateswara Rao 759 Axisymmetric free vibrations of internally compressed moderately thick annular plates

Announcements

767 Calls for papers: The Fourth International Conference on The Application of Artificial Intelligence to Civil and Structural Engineering; The Sixth International Conference on Civil and Structural Engineering Computing; The Third International Conference on Computational Structures Technology

I Software Survey Section

NUMBER 4

Jih-Hua Chin and Gwo-Tey Tseng 773 Structural design under multioptimal consideration

M. V. V. Murthy 787 On improving the membrane capability of a four-noded quadrilateral element

Yuan-Yao Qian and G. Dhatt 801 A simple, adaptable 2D mesh generation package

Wen Chen, Wen-Min Ren and Wei Zhang 811 Buckling analysis of ring-stiffened cylindrical shells with cutouts by mixed method of finite strip and finite element

R. Buczkowski, M. Kleiber and **U. Gabbert**	817	On linear and higher order standard finite elements for 3D-nonlinear contact problem
P. Fuschi, M. Dutko, D. Perić and **D. R. J. Owen**	825	On numerical integration of the five-parameter model for concrete
G. E. Blandford	839	Stability analysis of flexibly connected thin-walled space frames
Chongbin Zhao, T. P. Xu and **S. Valliappan**	849	Numerical modelling of mass transport problems in porous media: a review
Zhiming Ye	861	Dynamics of ships side launching
F. Gordaninejad and **S. Vaidyaraman**	867	Active and passive control of a revolute-prismatic flexible composite-material robot arm
P. F. Pai and **A. H. Nayfeh**	877	A new method for the modeling of geometric nonlinearities in structures
P. R. Bose and **T. K. Datta**	897	Lateral–torsional motion of tall buildings to along-wind forces
X. D. Li and **N.-E. Wiberg**	907	*A posteriori* error estimate by element patch post-processing, adaptive analysis in energy and L_2 norms
R. Eymard	921	Allowing for the creep of concrete in a finite-element structural calculation
X. L. Guan and **R. E. Melchers**	929	An efficient formulation for limit state function gradient calculation
Y. S. Tarng and **T. S. Hwang**	937	An investigation of the specific cutting force and its direction factors in turning
Zone-Ching Lin and **Don-Tsun Lin**	947	Dynamic deflection analysis of a planar robot
Jong-Shyong Wu and **Jye-Ming Chen**	961	Dynamic analysis of spatial beam-like lattice girders
C. C. Baniotopoulos, K. M. Abdalla and **P. D. Panagiotopoulos**	983	A variational inequality and quadratic programming approach to the separation problem of steel bolted brackets
R. M. Lin, M. K. Lim and **H. Du**	993	Deflection of plates with nonlinear boundary supports using generalized differential quadrature
Qi Zhao Hui, Wang Bin and **Feng Guan Min**	1001	A new approach to formulation of the governing equations of constrained multibody systems
C. J. Younis and **D. A. Sotiropoulos**	1007	A parametric study of bi-material bond response to wave excitation

Zhuhai Lin and **M. Raoof**	1015	Isoparametric finite strip element
		Technical Notes
L. K. Seah and **K. T. Ooi**	1023	Computer-aided design of an artillery system
M. W. Fahmy and **A. H. Namini**	1033	A survey of parallel nonlinear dynamic analysis methodologies
		Announcement
	1045	Call for papers: The Third International Conference on Computational Structures Technology
	I	Software Survey Section

NUMBER 5

T. Chyzy, L. Krasuski, Cz. Miedzialowski and **R. Tribillo**	1047	Finite element generation in boundary areas in plane problems of theory of elasticity
Jingming Ma and **Meifeng Le**	1053	A simple model of couple-stress theory for fiber-reinforced composites—I. Theoretical formulas
Jingming Ma	1059	A simple model of couple-stress theory for fiber-reinforced composites—II. Numerical analyses
Lai Yuanming and **Wu Yaping**	1067	Linear and nonlinear analysis of a simply-supported combined parabolical cylinder roof
D. Rubinstein, N. Galili and **A. Libai**	1073	Fully inverse dynamics of very flexible beam using a finite element approach and Lagrange formulation
Li Qiusheng, Cao Hong and **Li Guiqing**	1085	Stability analysis of a bar with multi-segments of varying cross-section
Jeong Seo Koo and **Byung Man Kwak**	1091	A laminated composite beam element separately interpolated for the bending and shearing deflections without increase in nodal DOF
H. C. Chan, Y. K. Cheung and **Y. P. Huang**	1099	Nonlinear modelling of reinforced concrete structures
H. C. Chen	1109	Efficient vibration analysis of general structural systems
Deng Zichen	1115	The optimal solution of the constrained nonlinear control system
L. Jiang and **M. W. Chernuka**	1123	A simple four-noded corotational shell element for arbitrarily large rotations
R. Levy	1133	Optimal design of trusses for overall stability
R. Levy	1139	Optimization for buckling with exact geometries

S. K. Sharan	1145	Finite element analysis of infinite solids using elastic supports
P. A. F. Martins, J. C. P. Marmelo, J. M. C. Rodrigues and **M. J. M. Barata Marques**	1153	PLARMSH3—a three-dimensional program for remeshing in metal forming
N. Bonora, M. Costanzi and **M. Marchetti**	1167	A computational procedure to calculate stress–strain field around simple shape holes in composite laminates
B. Cochelin	1181	A path-following technique via an asymptotic–numerical method
M. R. Prabhu and **R. Dhanaraj**	1193	Thermal buckling of laminated composite plates
T. Mizusawa, H. Kito and **T. Kajita**	1205	Vibration of annular sector Mindlin plates by the spline strip method
G. A. Mohr	1217	Finite element optimization of structures—I
G. A. Mohr	1221	Finite element optimization of structures—II
M. A. Al-A'ali and **M. A. Ajiz**	1225	Efficient algorithm for linear problems using packed data structure with a set of parallel pointers
S. E. Chidiac, F. A. Mirza and **D. S. Wilkinson**	1235	A simplified welding arc model by the finite element method
		Technical Notes
C. C. Baniotopoulos	1243	On the discrete optimal control problem of composite wall structures
P. Shamsedin	1247	Flexible hierarchical information structure for early stage girder bridge design
		Announcement
	1255	Call for papers: The Third International Conference on Computational Structures Technology
	I	Software Survey Section
		NUMBER 6
Huiyu Xue	1257	A combined dynamic finite element–Riccati transfer matrix method for solving non-linear eigenproblems of vibrations
P. K. Gotsis and **J. D. Guptill**	1263	Fiber composite thin shells subjected to thermal buckling loads
M. M. El-Hawary	1275	Effect of horizontal diaphragm flexibility on the *P*–delta analysis

Wei-Jer Wang and **Kuanchung Lin**	1281	Free vibration of laminated plates using a finite strip method based on a higher-order plate theory
R. Cerioni and **G. Donida**	1291	A finite element model for the nonlinear analysis of reinforced and prestressed masonry walls
Y. Toi, K. Kobashi and **T. Iezawa**	1307	Finite element analysis of thermal elasto-plastic behaviours of bridge girders in hot-dip galvanization
Mallikarjuna and **P. Mahadevappa**	1317	Computer-aided analysis of reinforced concrete columns subjected to axial compression and bending. Part II: T-shaped sections
Haengsoo Lee, Dong-Won Jung, Jin-Ho Jeong and **Seyoung Im**	1357	Finite element analysis of lateral buckling for beam structures
G. Karami and **S. Ghazanfari Oskooei**	1373	A thermoelastic analysis of shrink-fit type constructions by boundary element method
J. E. Abdalla and **J. O. Dow**	1381	An error analysis approach for laminated composite plate finite element models
Jiang Qian, Wenda Lu and **Zhiyuan Weng**	1389	A comparative study of the cable-stayed bridge with unilateral supports
G. M. Barsan	1395	Optimal design of planar frames based on structural performance criteria
I. Elishakoff, R. T. Haftka and **J. Fang**	1401	Structural design under bounded uncertainty—optimization with anti-optimization
M. V. Reddy, R. V. Grandhi and **D. A. Hopkins**	1407	Reliability based structural optimization: a simplified safety index approach
H. R. H. Kabir and **J. B. Kennedy**	1419	Analysis of moderately-thick and deep shells subjected to thermal and mechanical loadings
Z. Cai, G. P. Raymond and **R. J. Bathurst**	1427	Natural vibration analysis of rail track as a system of elastically coupled beam structures on Winkler foundation
S. M. Arnold, A. F. Saleeb, H. Q. Tan and **Y. Zhang**	1437	Explicit robust schemes for implementation of general principal value-based constitutive models
O. K. Bedair and **A. Sherbourne**	1453	On the stability of plates under combined compression and in-plane bending
Hua Zhao	1465	Analysis of the load distribution in a bolt–nut connector
V. D. Chuban and **A. B. Kudryashov**	1473	'Integral' finite elements for designing the strong frames of highly maneuverable airplanes

Technical Notes

Guo Chengxi 1485 Some notes with regard to elastic mechanics

Y. M. Xie and **G. P. Steven** 1487 A simple approach to structural frequency optimization

C. J. Brown and **A. L. Yettram** 1493 Elastic stability of orthotropic plates using the conjugate load/displacement method

Announcement

1497 Call for papers: The Third International Conference on Computational Structures Technology

I Software Survey Section
